JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Ka-sa-yein-tuk-wah, "It brings the frost," Wild Aster. *Teu-te-nah-ki-en-tun-oo-noo-kwa-sa*, "Sheep Burr," Hound's Tongue. The first six syllables mean sheep. *Oo-koh-ha-tah*, Elm; *Kah-en-ta-keh-a-tah*, White Oak; *O-yen-kwa-hon-we*, "Real Tobacco," (*N. rustica*, Lin.) *Deut-soo-kwa-no-ne*, "Round Nut," Black Walnut. *Ka-ha-tak-ne*, "Dusty Fruit," Wild Plum.

W. M. BEAUCHAMP.

Botanical Notes.

The Audubon Monument. A committee appointed by the New York Academy of Sciences has been at work for some months obtaining funds for the erection of a monument to John James Audubon in New York City. As an incentive towards contributions, this committee has obtained prints from the best portrait of Audubon in existence, and is prepared to furnish them to all who will contribute one dollar or more. These portraits are of two sizes, the one suitable for binding in a journal; the other suitable for framing. Remittances should be made to the Treasurer of the Audubon Monument Committee, New York Academy of Sciences, Columbia College, New York City.

A National Museum has been established in Costa Rica, and its first annual report has been received. From this we learn that an earnest commencement has been made toward the formation of an herbarium. Mr. J. J. Cooper has been employed to collect plants, which are to be sent to Capt J. D. Smith, of Baltimore, for determination. A collection of two hundred wood-sections, each one meter in length, has already been made.

Botanical Notes.—Mary K. Curran. (Proc. Cal. Acad. Sci., 2d Ser., i. Also reprinted).

The great interest which centers at present in the Pacific coast flora leads us to welcome eagerly any contribution upon the subject. The writer of this paper has evidently collected and observed much, and might have given us—what upon casual reading this seems to be—a valuable and reliable contribution. But careful comparison reveals violations of the scientific spirit
